

Door Depot Shipping Crate

The **Door Depot** shipping crate is built tough - about 90" long by 40" wide, with variable heights depending on the order. Each crate starts with a solid plywood base on a heavy-duty pallet, surrounded by four sides framed with vertical 2x4s, topped with a plywood sheet and reinforced with 2x4 cross bracing for maximum strength.

This rugged "coffin-style" design is how we ship every door order - arriving damage-free 99.5% of the time.
